 | Op all the birds that please us with usir lays, the most popular is the isen. Can anything that is baleful be a leasing? Yes, a bale of cotton. |
| Cettysburg Compilet, | Farming Department. | The average depth of New England seil is probably somewhere between four and six Inches. Some of the alluvial, or of the heavy upland soils, will | is more than that, but the plans and
much of the sandy bouns will be less.
In the highly callivated parts of Eu-
rope, the average depth of the soil is
now home or six indea. Tadde mount | phr. universe sa transactions when phr. universe said en gradually be made deeper; and the deoper it is the converse when the plants will grow or the converse said for the converse said. | by the most careful observations and experiments made in Germany, it uppeared that if a soil six inches thick was worth fifty, that seven inches thick [
 | was worth afty-four, so that, going lack in the scale, that only lawe inches 1-iek would be worth thirty-eight. A little deeper piewing manually, and | a regular increase of the vegetable matery, would constantly increase the depth of the soil, and as constantly in- | crease the value of the crop. The ma-
jortance of a deep soil will be seen,
when it is nodiced that it costs about an
amon't be work a soil of three inclus its? | if the state of section of the state of the | Where circumstances are favorable, the roots of plants penetrate the soft much deeper than they are usually sup- | posed to do. In cetamin process, the constant of red cloyer will go down sky feet. By careful examination, selute in it found the roots of winter wheat as
 | deep as seven Inches, in a light soil, for-
ty seven days after sowing. The roots
or clover one year old, where three and | one-latt feet, those of two year out the virt, but four inches longer. A parsuip will ordinarily grow in a contion soil is about one foot In length, lot dix a | hole five or six freel deep, fill it with rich lean, sow a few seeds on the surface and some of the plants will be | quate likely to find the bottom of the
hele!
One of the great advantages of a deep | soil, therefore, is a targe accombination or roots, these decay, constantly in- er use the amount of vegetable multer (in the soil, counteract the effects of [1]
 | drought, and greatly increase the amount of crops.—New England Farm- | Harran Walking Horses,—Wheth-
or for traveling of for furn purposes a
lest walk is the best gall for a herse,
and with suction the the Recoll World. | grest the following advice for the pre-
duction of fast walking houses: Breeders should have those in walking name of this
nation. In soluction adultion to breed | link, by all means of the four walk first, A slow walking stallion will be likely to get slow walking colts; | whife the stuffon that has a long, rapid, sputted strice, will be likely to beget coits of a similar action. Then there is
 | a great deal in brreding to a horse with spirit and ambition. These cold-blooder in orms will beget cold-flooded colls. The neuery you can approach the ther- | ough bred, even for obtaining a fissl walker, the better, There is game there, and spirit and endurance and suitnon and step. There are the near | hony heads and prominent eyes, the question leave, the cupacious nostrils, the editors in the well devel- he eged muscles, the bones as deuse as prepared muscles, the bones as deuse as | ivery. Even for walkens, then, get the
nemest to therough bred possible, and
the same for trotters, and of course, the | sume for vinders, the mayo then losses he for any purpose—to land the plough, or buggy, at curringe, or to carry you upon their
 | hacks. Preed large, me many, to thor-
ough brot horses, and you will get colts
that you will not be aslumed to have
your friends see. | DRY FUOD FOR HOUSIS,—The Spirit of the Tracs sugst. "We never have believed and never shall believe that chop- | ped hay and cornnead, esturated with
water, is proper for a working horse as
a general diet. We firmly believe that | the road of a working large who emitted by practiced should be grood sound only and sweet hay for at least five days a veck. Look at the south, where the | ecumon run of working houses are fed
on cent. What is found there? Why,
the big lead, a terrible and almost In-
erizible complaint. We also think that
 | wet cornmed is the very worst way of or teeding corn to a horse that ever was a practiced. And the chopped wet hay is not half so good as the, beight tim- | othy from the mow. We like to hear
the horse grinding up his good kinothy
hay like a grist null, after he has thiste-
ed his outs. A nice mash ence in a | while is good, and a very different thing
from almost constant soft diet."
PACING HORSEY.—In Barbary, pre- | ing horses are held in auch bigh estima-
tion that the method of making a spir-
ited trotter shackle like a bout in a
chop sea is reduced to a science. To
 | make them rack rusily, a ring or lend
covered with leather is put around each
hoof, a cord from each weight ascends
and is fastened to the suddite, from and | rese, rest, a step and bottominist from the fore to the hind feet on both sides. Their priber short, it is impos-side, to no both a rest of the feet o | sing to make a now sury. Restring roupels the animal to practice new goal to progress at all. As soon as a habit is established of going about. | thus tethered, the desirable object is fully and permanently accomplished. THE WILL WORK —A writer in the | 11:s/rm Rarad snys: Hawing seen a request by Mr. Wisely, of Onlo, for uran-edy for whe worms, I will give you a plan that I have practiced for the last | eight yeurs. I take good sound seed, put it in a tub or some other convenient vessel, take one and one-half pounds of salt petre per bushel, dissolve it and | pour it over the corn; lot it soak until
the corn is swelled rend; to spront, and
then plant. The worns will not trou-
ble it. Try it and report.
 | SUE TO THE SHEEF.—Sheep thin in they should now be sorted from the tlock and given the advantage of exerc. | feed. In most facets where there has been a matural increase, namy of the twee have been reduced in feest by sustaining two lives, and such will be very | likely to farmish a pelk betoro spring,
anless properly ritted for winter. The
way to keep a strong, healthy flock is
not to let any got 1000r. | Household Department. | GINGURBERD PUDING,—Ifalf a pound of Bour, one-foll pound of treach, one-foll pound treach, and a firth grade, plugg: mix with milk and
 | hollor frank frank frank frank frank frank frank hollow frank fran | und one pound of mermelude. Mix well with four egges, and boll for four thours. HALF-PAY PUDDING.—Four ounces of the following ingredlents: Nuct. b |
